

SuperGlide Hitch Cover Instructions

Part #3334

1. Place the hole, located on the back left corner of the hitch cover, over the handle of the hitch.
2. Pull the sides of the cover down both sides of the hitch and attach the J-channels.
3. Pull the front and back portions of the cover snugly over the hitch, and make a mark on the front and back where the Velcro strips on the cover should be located for a tight fit.
4. Remove the cover.
5. Clean and dry the areas you have marked before attaching the Velcro.
6. Remove the backing to expose the sticky side of the Velcro and position where you made your marks. Be sure the Velcro is firmly secured.
7. Place the cover back on the hitch.

NOTE: If you have Universal Rails, you may need to trim the J-channel as it may be too long.
