

Revised 12.3.2009

SuperGlide - Short Box 5th Wheel Hitches

Call 800/443-2307 for application info when king pin is located behind front edge of trailer

The 14K & 18K SuperGlide Hitches have the option of using either Universal Mounting Kits with fixed base rails, or SuperRail Kits, with custom designed mounting brackets and totally removable SuperRails and Mounting Posts.

The 12K & 24K SuperGlide hitch mounting kits all feature custom designed mounting brackets and are totally removable, leaving a smooth, clean truck bed when the hitch is removed.

Due to space limitations, super-short bed trucks – those with beds less than 6' - are not usually recommended for 5th wheel towing. In some cases the 12K SuperGlide will make towing possible. Factors that determine the clearance or towing suitability include; make & model of truck; the location of the king pin in relation to the front of the trailer; the width of the trailer; and the shape of the trailer front cap. Depending on these factors, turning may be severely limited. In cases where there will be less than 3" clearance in a 90 degree turn, it is not recommended. For specific vehicle/trailer combinations, call for additional information.

Suggested Retail Pricing for Mounting Kits
